Custom Photo Images & Framing

1287 West Palmetto Park Road, Boca Raton, Florida 33486 • 561-361-0031 • www.peterlorber.com

Printing – Standard and Specialty Media

Museum quality Custom Fine Art prints and Giclée Prints are custom printed one at a time by trained professional fine art printmakers. Prints are made with the highest-quality Epson archival inks on a selection of Epson fine art papers using an Epson high-resolution large format inkjet printer creating breathtaking Museum and Art Gallery quality prints. Each print is carefully inspected to insure perfect prints with outstanding color and depth.

Standard Media

Epson Premium Luster Photo Paper
Epson Enhanced Matte Paper

Fine Art Media

Epson Cold Press Natural
Epson Metallic Paper Glossy

Not all available sizes are listed. We can print up to 60 in x 1200 in or 5 ft x 100 ft

Canvas Prints - Print Only - Rolled

We custom print on an elegantly textured exhibition grade canvas. Our canvas prints are acid free, heavyweight cotton-poly blend, with a semi-gloss satin surface with a bright white point, exceptional high Dmax and wide color gamut.

Rolled Canvas Prints are a flexible option for those who are looking to do the framing themselves. Our canvas prints are printed on premium artist canvas material and include a 2-inch canvas border.

Color or mirrored edges can be added.

Not all available sizes are listed. We can print up to 60x1200 inches or 5x100 feet

Canvas Prints - Stretching Only

Price Does Not Include Print

Stretched Canvas Prints are finished products ready to hang without a frame. Each Canvas is hand stretched and wrapped over premium wooden stretcher bars. Unlike other frame shops we will not use construction grade wood or inferior quality stretcher bars. We use only first grade precision cut kiln dried wood that will not warp or split.

We can mirror or reflect the main image on the sides of each canvas print to create a seamless finished look without any loss or crop of the main image.

Not all available sizes are listed. We can print up to 60x1200 inches or 5x100 feet

Standard Size	Up To Square Inches	$\frac{3}{4} \times 1\frac{1}{2}$ Or $\frac{3}{4} \times 2\frac{1}{2}$	$1\frac{3}{8} \times 1\frac{1}{2}$ Or $1\frac{3}{8} \times 2$

Mounted Prints - Floater Mount & Box Mount

Price Does Not Include Print

Floater Mount
Shown in Black

Also Available in White

Box Mount
Shown in Black

Also Available in White

Create a clean timeless look with our Floater or Box Mounted prints. A beautiful yet affordable wall display option.

Floater Mounts - First we mount the print on masonite, with an acid free adhesive film. Next we attach a small box frame to the back and inset two and a half inches all round. Finally we paint the edges and frame black or white. The final product appears to be floating on the wall giving it a clean timeless look.

Box Mounts - First we mount the print on masonite with an acid free adhesive film. Next we attach a 1" box frame flush with the edge of the image. Finally we paint the sides black or white.

What is Masonite? - Masonite is 1/8" durable, high density wood chipboard, with a smooth, even surface.

How do I use this pricelist? - First find out the cost of your print on the **Printing - Standard and Specialty Media** page of our price list. Next find the closest size or square inches of your desired print and add the two together. **Please note not all available sizes are listed as the possibilities are endless.**

Face Mounted Acrylic Prints & Wall Mounted Acrylic Cutouts

Highly detailed prints with brilliant colors, mounted behind polished acrylic for a dramatic and stunning effect

Your photos are printed on archival Epson Metallic Photo paper using Epson archival inks. This paper and ink combination gives your print a luminous and iridescent appearance with sharp imagery, large dynamic range and rich colors.

We then face mount your print onto our clear acrylic, finished with your choice of 1/8" black or white sintra (PVC) adhered to the back. We attach a black or white sub frame to the back for easy hanging giving the effect of your print floating on the wall.

Wall mounted acrylic cutouts are custom laser cut. We attach a black sub frame to the back for easy hanging giving a 3D effect of the print floating on the wall. Larger images have an extra layer of masonite adhered to the back for stability.

How do I use this pricelist? - Find the closest size or square inches of your desired print to determine the cost.

Scanning - Slides, Negatives or Photos

We Digitize your old images using a top of the line Hasselblad virtual drum scanner, the best and safest way to scan. All scanning is done right here on premises, your originals never leave our store.

We Scan:

Color negative and slide film, black and white negatives, from 35mm to 5 inch film, sheet film, glass negatives, vintage film sizes, slide viewers, long panoramic negatives, (basically anything but Disc film and APS film)

We also offer flatbed scans for originals up to 8x10. Anything larger we create a digital file using the newest Hasselblad digital medium format camera creating files large enough to blow up to 40x60.

Slides, transparencies and prints are cleaned before scanning. Removing all dust before scanning is impossible; therefore it is likely dust spots will still be visible on image files.

Basic cleaning includes cleaning of large dust spots on scanned image file.

Dirty, old, scratched or marred originals require cleaning above and beyond the norm. For additional clean up of these images there is a fee of \$23 per 1/4 hour. We will contact you before incurring any additional charges.

Hasselblad 3F Raw 16bit Scan (Film Only)

200 to 500 MB depending on the size of the original

3F is a proprietary file created by Hasselblad, which allows one to get from film a file that, from a functional point of view, is the equivalent of a digital camera raw file. Scans can only be processed with Hasselblad's free software download, Flextight.

Number of originals / cost per	1-10 / \$15 each	11-20 / \$12 each	21-49 / \$10 each	50+ / \$8 each

Artwork Reproduction - High Resolution Digital Photography

How do we consistently produce images with superior detail and color rendition to all other photography studios? Simple, we use the newest Hasselblad Professional Medium Format Digital Camera, the best tool in the world for photography where ultimate image quality, color, and detail are important. The H5D-200c MS camera uses a 50MP CMOS sensor mounted onto the Hasselblad patented symmetrical multi-shot frame, which accurately positions the sensor with a submicron accuracy using piezoelectric actuators. It can capture 6 shots with the sensor positioned accurately at a sequence of quadrants of the pixel and takes color information from the Bayer-patterned pixels to create a 200MP capture. This results in a leap in resolution that has to be seen to fully appreciate the tremendous difference it makes. Be prepared to be impressed beyond your expectations.

Fine Color Rendition - <i>Single-shot</i> The key to the singleshot quality from a CMOS sensor is the use of a Bayer Mosaic filter. This is a specific filter layout that is used in conjunction with software to interpret the color data from the sensor. A single-shot system delivers one color per pixel, and the remaining two channels must be estimated and calculated using a best guess strategy. This is done in Hasselblad cameras by using algorithms that optimize color rendition and sharpness without disturbing the perception of the human eye by the artifacts always present in raw single shot captures.	\$85.00 with proof \$75.00 w/o proof	<ul style="list-style-type: none"> • One high resolution digital capture of original art • Neutral grey balanced • One full size 150mb* (uncropped) 8 bit TIFF file • One full size 280mb* (uncropped) 16 bit TIFF file • One full size JPEG file • One downsized JPEG file for emailing • One sample print <p>*please note images cropped to original artwork will be slightly smaller</p>
Extra Fine Color Rendition - <i>Four shot</i> The advanced Hasselblad Multishot technology eliminates the issues that the single-shot interpolation routine can sometimes introduce, such as moiré and color rendering issues, by physically moving the sensor 1 pixel at a time, thereby capturing the red, green and blue information in each individual pixel point and then combining these captures into one. This results in a true color and moiré free capture with increased level of detail as there is no need for interpolation at all.	\$ 160.00	<ul style="list-style-type: none"> • One high resolution digital capture of original art • Neutral grey balanced • One full size 150mb* (uncropped) 8 bit TIFF file • One full size 280mb* (uncropped) 16 bit TIFF file • One full size JPEG file • One downsized JPEG for emailing • One sample print <p>*please note images cropped to original artwork will be slightly smaller</p>
Super Sized Extra Fine Color Rendition - <i>Six shot</i> High precision piezoelectric actuators control movements of the sensor in ½ and in one pixel increments. By combining six shots, offset by a combination of both ½ pixel increments and one pixel increments, the colors, Red, Green and Blue of each point are obtained with a double resolution in both the X and Y directions. The result is an astonishing 200MP full color image with no artifacts, such as moiré. The Bayer Mosaic filter pattern covers the pixels of the sensor. Moving the sensor in one pixel increments between shots, allows for the exact R, G, B values to be captured in every pixel. The multiple captures are then assembled to deliver the correct colors and ultimate definition of detail.	\$ 260.00	<ul style="list-style-type: none"> • One high resolution digital capture of original art • Neutral grey balanced • One full size 600mb* (uncropped) 8 bit TIFF file • One full size 1.1gb* (uncropped) 16 bit TIFF file • One full size JPEG file • One downsized JPEG for emailing • One sample print <p>*please note images cropped to original artwork will be slightly smaller</p>
Custom Color Correction	\$125 for first hour then half hour intervals at \$62.50 each	One on one session to correct color to your satisfaction
Sample prints	\$10 each	Image printed on 8 1/2 x 11 proof template on media of choice. One image per page.
Digital copy of color corrected file	\$ 50.00 per image	Full size TIFF 16 or 8 bit, full size JPEG, downsized JPEG for emailing

Business Headshots, Portraits, Passport Photos, Product Photography

Business Headshots

\$25 booking fee will be charged to your credit card at the time of scheduling. This fee will be deducted from the session total.

Sitting fee	\$ 70.00 per person	Studio portrait with a Hasselblad professional medium format digital camera. Includes your choice of one pose with basic retouching. Sessions are up to 45 minutes.
Session Overtime	\$ 25.00 per 15 Minutes	If you need a longer session or your session runs over 45 minutes.
Additional poses	\$ 25.00 per pose	Additional selected pose with basic retouching.
Retouching	\$ 25.00 per ¼ hour	Retouching beyond basic
Outfit change	\$ 20.00 per outfit change	
Digital background input	\$50.00	Choose from a wide variety of digital backgrounds including, but not limited to beach scenes, local scenes, and mountain vistas

Domestic and International Passport and Visa Photos

USA Passport Photo	19.95	One set of two pictures or one emailed digital photo
International Passport and Visa Photos (including Canada)	24.95	One set of two pictures or one emailed digital photo
Additional sets of prints at time of sitting	2.95	One set of two photos
Resizing for additional countries at time of sitting	10.00	One set of two pictures or one emailed digital photo
For both digital and print photos	10.00	One set of two pictures or one emailed digital photo

Product Photography

\$ 125 Set up fee (includes first image)

\$ 25 Each additional similar product (like items) photography only

\$ 50 Each additional similar product with post processing (color correction, fine tuning of lighting, etc.)

All images are on a white or black background

Prices are for products measuring up to 12 inches on the longest side. Larger products are quote only.

All products are photographed in the condition they are given to us.

Retouching and Restoration, Machine Prints

Retouching and Restoration

We do it all! Simple red eye removal, fixing facial blemishes, scratches and imperfections, object removal, blur background, facelifts, add or remove people, restore torn stained or faded photographs and much more!

\$ 25.00 per 1/4 hour of computer time

Estimate given when order is placed
